Lumigan (Bimatoprost)

Eyelash/Eyebrow Growth Enhancer

Please read this leaflet before you use your medicine. This leaflet provides some useful information for you on your medicine. If you have any questions, please contact us. No liability is accepted for misinterpretation of this information.

Please read the manufacturer's instructions in conjunction with this leaflet.

1. About your medicine

Lumigan contains the active ingredient Bimatoprost.

- Please note we **ONLY** prescribe Lumigan for eyelash/eyebrow growth enhancement and **NOT** for glaucoma.
- This medication is licensed for treating glaucoma, but has the ability to generate eyelash growth when applied externally to the eyelash base.
- You should **NOT** apply this medication if you have liver or kidney problems.
- You should **NOT** apply this medication if you are pregnant, planning to get pregnant or breast feeding.

Westminster House, 49 Knowsley Street, Bury, Greater Manchester, BL9 0ST.
Tel: 0161-762-9108 Fax: 0161-272-0292
www.medical-specialists.co.uk

- You should **NOT** apply this medication if you have had any problems with your cornea (front transparent part of the eye).
- If you suffer from Asthma, this medication may exacerbate your condition. If so, please **STOP** using this medication immediately.

2. How to apply

- Apply once daily.
- Close the eye and apply a small amount to the base of your upper lashes (roots of your lashes), or eyebrows. A small sterile eyeliner brush or cotton bud may be helpful to apply it.
- Do **NOT** apply to the eyeball as the main target area is the base of the upper lashes (roots).
- Wipe away any liquid using a soft tissue and discard it.
- Carry out the same procedure with the second eye.
- Please note we do **NOT** dispense this medication for glaucoma, and should **NOT** be applied to the eyeball.

3. Warning / Precautions

- Do **NOT** apply to the eyeball. The target area to apply the medication is the base of the upper lashes (roots), or eyebrows.
- LUMIGAN may cause your eyelashes to darken and grow, and cause the skin around the eyelid to darken too.

Westminster House, 49 Knowsley Street, Bury, Greater Manchester, BL9 0ST.

www.medical-specialists.co.uk

- The colour of your iris may also go darker over time if applied to the eyeball.
- The colour change may be more noticeable if you are only treating one eye.
- Lumigan has not been tested in children under the age of 18 and therefore should not be used in patients under the age of 18.
- Do **NOT** use Lumigan whilst wearing contact lenses. Wait 15 minutes after using the eye drops before putting your lenses back in.
